

Technical Bulletin

No. RET003AU
Release Date: 08/2013

Subject: Advanced Confined Space Safety Systems Compatibility

This technical bulletin has been created to illustrate the compatibility between varying models of DBI-SALA Advanced confined space safety systems.

The diagram below illustrates the available adapters allowing the installation of bases and davit arms from new and old system types.

For example, in order to use a new style DBI-SALA Advanced Confined Space Safety System with an old style base, adapter 8519960 can be used. If using an old style DBI-SALA davit arm (e.g. Models 8004030/8000055) with a new style Advanced base, adapter 8519958 can be used.

For more information regarding the compatibility of DBI-SALA advanced confined space systems, please contact Capital Safety.
